Nosenko insrt where I refer to Posner's omission od what he knew from Post Mortem:

Posner was charged with "intellectual dishonesty" over his account of what Nosenko said and knew. He made no meaningful response/ wheh he as charged that to his face by Dr. Cyril Wecht, former president of the American Acadamey of Forensic Science. It was on September 3, 1993, on the first of their several confrontations on the CNN "Crossfire" sgow show. Wecht confront Posner with what Nosenko told the FBI what the J KGB knew and believed about Oswald, what I had brought to light in Post Mortem.

What Wecht said that Posner made no response to is, "the KGB had surveillance on Oswald around the clock for nearly two years while he was in Minsk. They were affaid he was an American sleeper agent." (transcript CNN Transcript # 913)
